The Electrifying Lifestyle

SENEC

Your Life. Your Energy.

Make your home up to 100% self-sufficient.

With SENECloud you expand your solar & storage capacity with a virtual energy storage plan. Rather than exporting into the grid at low and decreasing tariffs, save your energy for later usage.

Your Solar Energy – any time you need it.

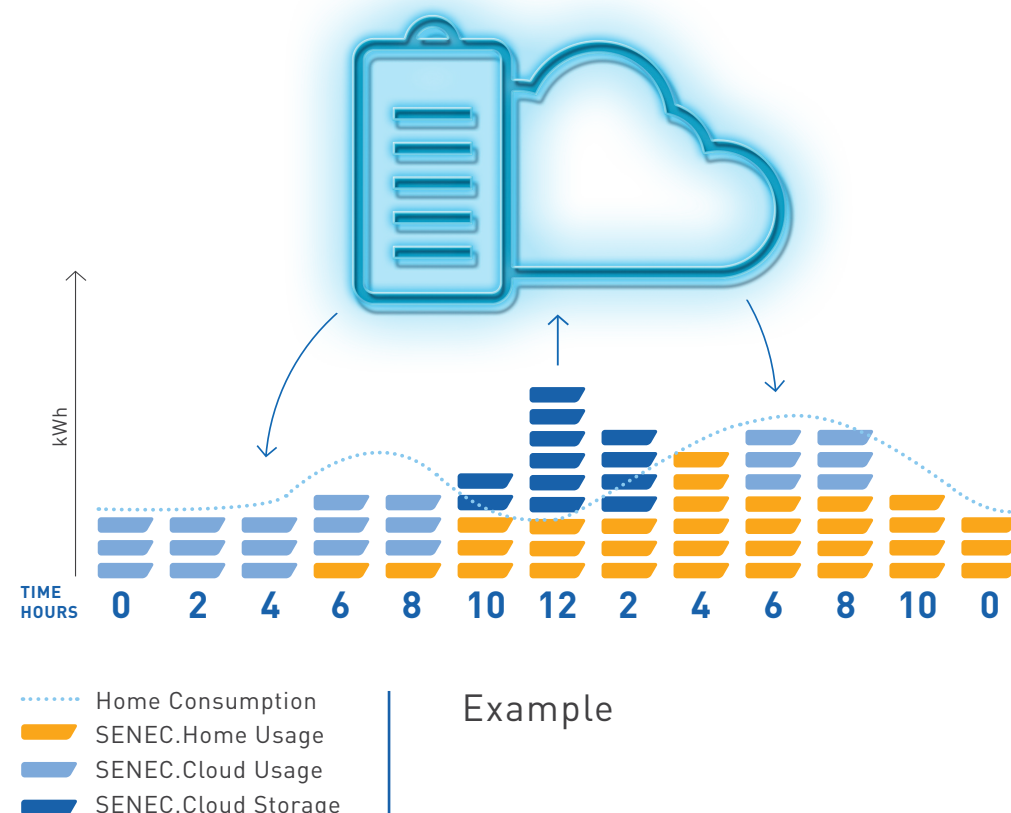

SENECloud is your virtual energy savings account. Your excess self generated solar energy will be credited to that account. You can flexibly use it any time you need it, and draw down from the grid at a 1:1 ratio, up to the limit of your SENECloud package. You export and import at the same rate.

Use your own energy – for home or mobility.

SENEC.Home together with SENECloud equals up to 100% self-sufficiency.

powered by

SENEC Australia is an electricity referral agent of Diamond Energy, who are a renewable energy generation and retail electricity company, operating across Australia, since 2004.

The SENECloud is powered by Diamond Energy, who are a green electricity provider with a 5-star rating in Greenpeace's 2022 Green Electricity Guide. Diamond Energy has been a long-term leader in renewable energy.

SENECloud – grows with your needs.

The Cloud Packages – simply clever.

Together with Diamond Energy we are offering very flexible packages* helping you to become up to 100% self-sufficient. The SENECloud Base Package is free of charge and grants you a quarterly Cloud allowance of 500 kWh's. Depending on your individual energy demand this may already ensure 100% self sufficiency for your home.

If you have excess solar energy available and you need to supply bigger loads such as an Electric Vehicle (EV), you can flexibly increase your allowance at any time with our incremental Add-on Packages. You may add up to four packages to double your allowance.

SENECloud Base Package Start easy.

The Base Package may provide 100% self-sufficiency if you do not use more than approx. 2,500 units a quarter, and your solar system is properly designed. For details refer to your SENECloud solar retailer.

\$ 0.00 / month

SENECloud 125 Add-on Increase as you grow.

Save more of your solar generation into the SENECloud, ready to draw down for when you are operating higher loads or want to also charge your car. You can increase your SENECloud allowance in increments of 125 kWh's a quarter.

\$ 0.17 / day

T&Cs apply. For more info refer to <https://diamondenergy.com.au/wp-content/uploads/2022/05/DE-SENECloud-TCs-FINAL-11May22-v1.pdf>
*Please note: SENECloud is a fixed-term contract which ends 31st December 2023.

Futureproof yourself All-in-one solution.

SENEC.Cloud is your solution for a self-sufficient energy supply for your home. Lower your energy cost and take the power back into your hands.

Ask your SENECloud solar retailer for more information, or call SENECloud directly on (08) 6280 1206.

SENECloud - FAQs.

Are there any fees I must pay to access or exit the SENECloud offering?

An initialisation fee of \$125 applies upon participation in the SENECloud there are no exit fees if you choose to stop participating.

Is this offer available everywhere in Australia?

The offer is available to residential homeowners in Victoria, South Australia, New South Wales, and Queensland (only within Energex distributor zone).

What are the eligibility requirements?

To be eligible you must be a residential homeowner that lives at the property and does not have registered life support equipment at the Supply Address.

- You must have a new SENECloud Home V3 Hybrid 10 system installed within the last 30 days.
- You must install a Solar-PV-Battery System with greater than or equal to 6kW DC panels.
- You must have a broadband internet service connected at the Supply Address with an internet modem, including a spare Ethernet port and Wi-Fi connectivity.
- You must accept direct debit payments and email invoicing.
- You acknowledge that our pay on time, direct debit, and renewable energy reward discounts will not apply.
- You must enter into a "single rate" electricity retail agreement with Diamond Energy and be prepared to accept quarterly electricity invoices.

The full eligibility criteria are included in the SENECloud Terms and Conditions.

How long am I able to stay on this offer?

You can enjoy the benefits of this offer for as long as the current SENECloud product is available, and you remain a customer of Diamond Energy. For up-to-date info refer to our website.
